

Omission of lens screw set for Ensenso X/XR

Affected Products:	Ensenso X and XR models featuring 5MP lenses (see listing below)
Type of Product Change:	<input checked="" type="checkbox"/> Change of Part Number/Scope of Delivery
Document Version:	1.0
Release date:	2020-12-01
Date of change:	2020-12-01

Reasons and description of the product adaption

As a measure for source reduction of waste the Ensenso X and XR packages will by default no longer contain a lens screw set consisting of setscrews M1.6x2 and hexagon key in a plastic bag.

Intended use for the lens screw set is altering the lens focus and aperture configuration to a custom optical configuration. To support this usage the lens screw set is made available on request with the current IDS article number CK01545.

Recommended actions for customers

No action is required for existing Ensenso X and XR setups. In case the lens screw set is required please contact IDS Sales.
